

Some information for members who have recently bought the Marathon micro motor with only the 3/32 collet. Steve brought his machine to Beenham today with spare collets. Martin and I tried to change the collet with one supplied by Cousins but they did not fit. The collets are for a pendant motor hand piece.

The correct parts are listed below. Cousins state that these Foredom collets will fit the Marathon Champion 3 micro motor

1/8 collet FDHP4117B £24.75

Adaptor FDHPL 43236 £13.75

Available from Cousins, prices + vat & shipping.

Please circulate this info to members who bought this machine.
